BATTERY POWERED HEAT GUN REPAIRS DAMAGED TENTS AND TARPAULINS

A fully portable heat gun kit that is ideal for repairing tents, liners, tarpaulins in remote locations, and even military aircraft wing surfaces, has been introduced by Malcom Hot Air Systems of Portsmouth, Rhode Island.

The Malcom MCH-100 Battle Damage Repair Kit features a lightweight heat gun that can reach temperatures up to 1100°F, has a built-in motor and fan that provides 2.66 CFM hot air flow, and includes a 48V rechargeable battery pack that weighs just 10 lbs. Featuring an assortment of nozzles and tools for plastic welding and overlap applications, this kit was designed for the U.S. Army to repair tents, liners, and tarpaulins at remote sites.

Suitable for a wide variety of related wire harness repairs, including soldering and de-soldering, the Malcom MCH-100 Battle Damage Repair Kit can be used around fueled vehicles and has passed Mil-Std-810 F (511.4) Explosive Atmosphere Test for N-Hexane and JP-5 Aviation Fuel.
